

# OSHA Approved Passive Safety Systems Requiring No Action or Thought by Users

## Waist-high Photo Sweep

Waist-high Infrared Photo Sweep runs the length of the shelving. When a person interrupts the safety beam, carriage movement stops. No thought is required to activate the safety.

## Aisle Entry and Exit Photo Sensors

Aisle Entry and Exit Photo Sensors detects people and whether they are entering or exiting the aisles.

## Zero Force Sensor

Zero Force Sensor detects and protects people and objects in an aisle. Safety beams run across the aisle, when a safety beam is interrupted, carriage movement stops.

## Infrared Photo Sweep

Infrared Photo Sweep runs the length of the carriage. When a person/object interrupts the safety beam, carriage movement stops. Optional mechanical sweep available.
