Some Accomplishments

Assembly and Security Recommendations

Stacking Brackets

Two sets of mounting brackets can be stacked if a shelf is bolted between the two sections of drawers.
Example : 36" + 18".

R5XEC-2001

IMPORTANT

The height of the top drawer must not exceed 60", unless you have the proper equipment to reach drawers higher than 60" in a safe manner.

Make sure that the shelving structure has been installed in compliance with manufacturer recommendations.

DRAWER IN SHELVING

Assembly

Assemble using simple tools in three easy steps :

- 1 Hook on the mounting brackets to the uprights
- 2 Hang the rails to the mounting brackets
- 3 Insert the drawers

The minimum space required for drawers depends on the height of the mounting brackets.

Make sure that the shelving is plumb, square and level.

The shelf above the drawers must be bolted in place (where possible) for added safety.

A shelf must be placed beneath 36" and 48" high mounting brackets. The shelf must be bolted in place where possible.

Anchoring shelving (particularly single rows) to the floor is mandatory.

To anchor Spider® shelving units,

SEE PAGE 62

To the floor or wall

* Subtract 1/2" for shelving with 1 1/2" adjustable shelves (c/c).
