REMSTAR

Accessible High Density
Automated Storage & Retrieval Systems

"The performance, ergonomics & productivity experts"

Remstar — Electric Lateral Filing

With thousands of installations, Remstar has established itself as a leader in providing accessible high density automated storage and retrieval systems.

Remstar is dedicated to creating productivity enhancing, ergonomically designed storage solutions to meet a wide range of office, institution, manufacturing and service industry needs.

Key Features

- ▶ From 9 to 40 carrier levels available
- ▶ Presents up to 115 linear filing inches per carrier level
- ▶ Carriers designed for many types of media and material
- ▶ Electric or manual work counter for convenient use
- ▶ Folding work counter option available
- ▶ Overhead light for easier use
- ▶ Push button controls deliver any level automatically
- ▶ Optional PC software increases accountability and productivity
- ▶ Available in any RAL color combination
- ▶ Two-part locking security door
- ▶ Safety features:
 - Two emergency stop buttons
 - Two safety touch bars
 - Two photo cells
- ▶ UL tested and approved
- ▶ CE compliance
- ▶ Manufacturing operations registered to ISO 9001 and 14001 standards

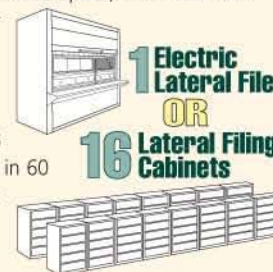

High Density File Storage in Half the Space

The Remstar Electric Lateral Filing System (ELF) is a series of vertically arranged rotating carriers controlled by an electronic keypad or software. Files are delivered to an ergonomically correct height, eliminating walk and search time, improving filing productivity up to 56 percent.

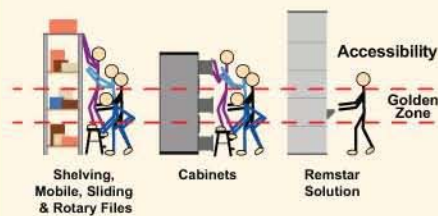

The Remstar ELF offers more than 2,500 linear inches of letter-sized filing space, the equivalent of approximately 16 - five drawer file cabinets. By taking advantage of unused overhead space, it can hold the same number of files as traditional five-drawer filing cabinets or lateral files in 60 to 75 percent less space.

Accessible Storage

The ergonomic design and operation of the Remstar ELF is fully compliant with the Americans with Disabilities Act (ADA) and OSHA regulations.

It is also compliant with the Uniform Federal Accessibility Standards (UFAS) for forward and side reach, clearance under the work counter, and control accessibility.

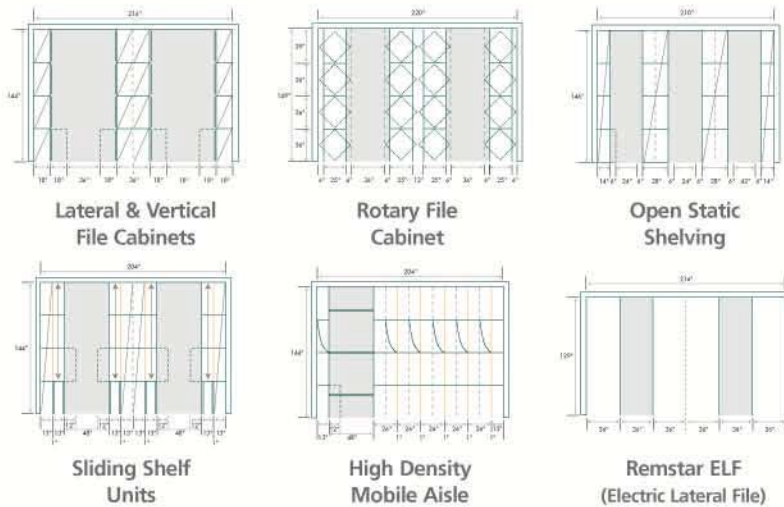

More Productivity Through Ergonomic Design

Traditional filing systems require users to bend, stoop, twist, reach, push, and pull to store and retrieve items, creating fatigue and reducing productivity. The ergonomic design and operation of the Remstar ELF system is based on principles of universal design that minimize physical effort such as twisting, bending and tight grasping.

These design principles provide easy system operation regardless of the user's body size, posture or mobility.

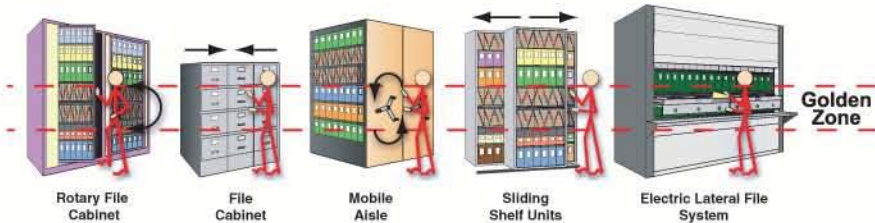

At the same time, the Remstar ELF offers improved storage density per square foot of floor space.

Filing Equipment Comparison □ = aisle space

For complete floorplan specifications and comparisons go to www.Remstar.com/performance

	Lateral & Vertical File Cabinets	Rotary File Cabinet	Open Static Shelving	Sliding Shelf Units	High Density Mobile Aisle	Remstar ELF (Electric Lateral File)
Performance: filing inches per square foot	10-15	30-35	25-30	30-35	50-55	50-55
Ergonomically Accessible Density: filing inches per square foot	6	8	15	10	33	50
Productivity: file actions per hour maximum	35	40	40	35	40	90

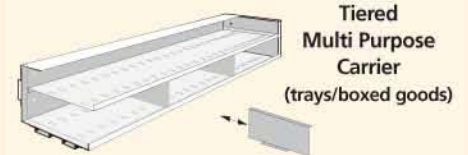

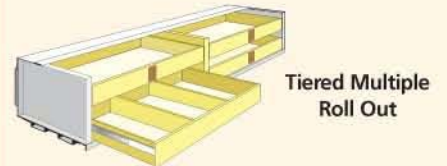

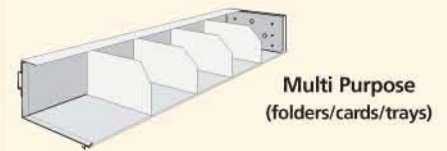

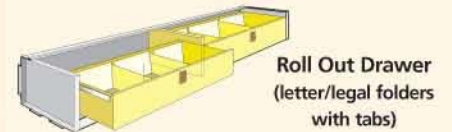

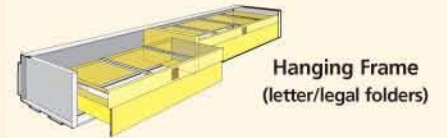

Eliminate Lurking Costs with More Efficient Personnel

Industry estimates indicate that the annualized total personnel costs for maintaining one four drawer file cabinet of active records is approximately \$1,078 or 83 percent of the total cost. Equipment, space and supplies account for the other 17 percent.

Because of its efficient operation, the Remstar ELF has the greatest number of filing actions per hour compared with other types of filing systems, effectively uncovering lurking costs.

Multiple Filing & Storage Configurations

A wide range of carrier configurations give the Remstar ELF unmatched flexibility in handling multi-media storage and retrieval requirements.

Customize to Match Your Decor

The Remstar ELF will fit into any office environment. The outside surface can be covered with laminates, veneer, natural woods, fabric, decals, glass, stainless steel and RAL color combinations.

Applications in Any Industry

The flexibility of the Remstar ELF makes it the most efficient file storage and retrieval system for applications in:

- ▶ Federal, State and Local Government
GSA: GS-25F-0038M
- ▶ Law Offices
- ▶ Insurance
- ▶ Healthcare
- ▶ School Systems
- ▶ Manufacturing
- ▶ Human Resources
- ▶ Purchasing
- ▶ Sales
- ▶ Administration
- ▶ Libraries
- ▶ Museums
- ▶ Evidence Storage

Selecting a System for Your Needs

The Remstar ELF is available in multiple widths and depths and is designed to fit in virtually any office floor plan. The Remstar ELF is designed to allow 14, 16 and 18 carrier units to be installed under standard 8', 9' and 10' ceilings respectively. An optimized design is also available for drop ceiling installations with 15, 17 and 19 carrier units available. Units can be placed directly side-by-side or back-to-back.

The ELF can be installed as a central file system or as a workstation and configured for front and back access or multiple floor access.

Remstar offers complete design consultation services to help create the perfect system for specific file storage and retrieval needs.

All specifications are nominal and subject to change without notice.

designed to help

organizations choose the system that best matches your storage and retrieval needs. Visit www.Remstar.com/CES to learn more about AIA continuing education credits.

Warranty

Remstar offers extensive manufacturers warranty coverage including a two-year and five-year warranty on parts and labor plus a lifetime warranty on the ELF motor.

Complete System Support

Installation and support is provided locally through factory trained and certified dealer service technicians. Problem solving, attention to detail and the highest levels of personalized service make Remstar the single source for your storage and retrieval solutions.

Vertical Solutions for Industrial Applications

In addition to the Electric Lateral File system, Remstar offers Industrial Vertical Carousel and inventory management and control software for manufacturing and warehousing applications.
