

Storage

FOR LIBRARY-VIDEO STORAGE

EDEN WEBSTER LIBRARY INCREASES STORAGE CAPACITY AND PROVIDES FOR FUTURE GROWTH

- WHAT:** The Eden Webster Library, St. Louis, MO.
- PROBLEM:** The S-1 system currently installed did not give them sufficient storage capacity for their current items nor did it allow for any future growth.
- OBJECTIVE:** Provide enough storage for 2400 Video Tapes and 2250 compact disks and an additional 10% growth.
- SOLUTION:** Expand the existing system by adding 4 rows of track and 4 carriages using 9"D shelving to accommodate video tapes and compact disks. The library started with 3 carriages then gradually built up to 5 carriages and are awaiting installation of the 6th carriage.
- PRODUCT:** Spacesaver S-1 Manual Assist with mechanical safety sweep with over head anti-tip.

UNIQUE FEATURES

- 9"D video and compact disk shelves offer the flexibility required.
- Overhead anti-tip for additional safety.
- Ability to customize media location on end panels.

BENEFITS

- Improved efficiency and maximization of building space.
- Very user friendly.
- Ability to add on additional carriages at minimal cost and disturbance to users.

"Although we have increased the capacity and the size of the rows, the system is not that much heavier to use and it gives us the necessary capacity we require. Our plan is to further increase capacity by adding yet another row."
