## **High-Density Storage Solutions That Save Space, Increase Productivity, and Reduce Operating Costs**

### **TYPICAL APPLICATIONS**

- Maintenance Supply
- Production and Service Parts
- Raw Materials
- Packaging Supplies
- Finished Goods
- R&D Samples
- Tool and Die
- Test Fixtures

### **ENGINEERED SOLUTIONS:**

- Mobile Shelving
- Compact Pallet Rack
- Vertical Carousels
- Vertical Lift Modules
- Horizontal Carousels
- Modular Mezzanines
- Two-Tier Shelving
- High Density Drawers
- Flexible Work Stations
- Modular In-Plant Offices
- Installation and Service

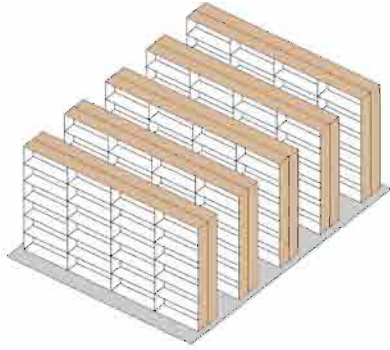

**Toll Free 1-800-803-1083**

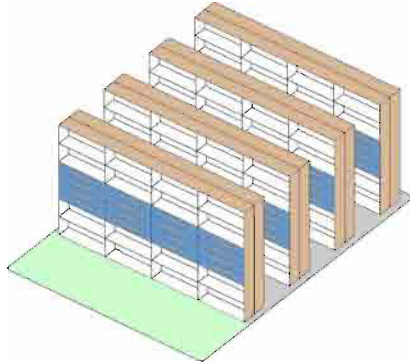

# High Density Mobile Systems:

- Consolidate floor space by reducing access aisles.
- Flexible designs provide for virtually any size storage location including small components in modular drawers to bulk items and palletized loads.
- Systems are lockable to secure contents.

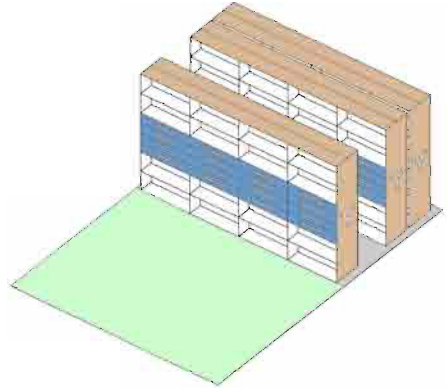

Conventional Shelving

Modular Drawers save 25%

Mobile Systems save 50%

With floor space and labor costs continually rising, Mobile Rack and Shelving Systems optimize storage of parts in support of maintenance, production, and shipping activities.

# Automated Vertical Storage Systems:

- Vertical Lifts and Carousels utilize unused overhead space often freeing up hundreds of square feet of floor space.
- Ideal solution when maximizing productivity is an important objective.
- Access Port provides ergonomic storage and retrieval of parts while eliminating travel time.
- Controls and Software maintain accurate inventory and reduce costs associated with lost parts, stock-outs, and surplus inventory.

## Vertical Lift Modules

- Maximum flexibility when items vary in size.
- Easily reconfigured when needs change.
- Unit heights from 8 feet to 40 feet

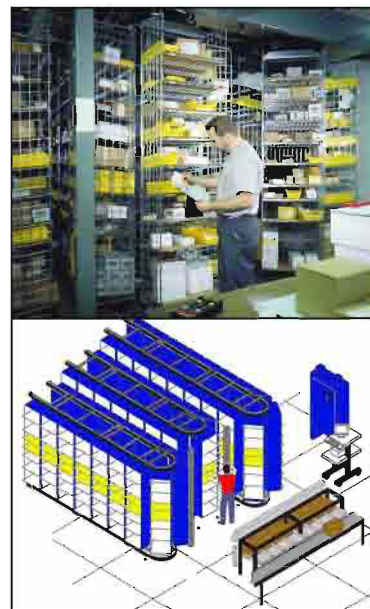

## Vertical Carousels

- Ideal for small part storage.
- Rapid cycle times maximize throughput.
- Unit heights from 8 feet to 32 feet

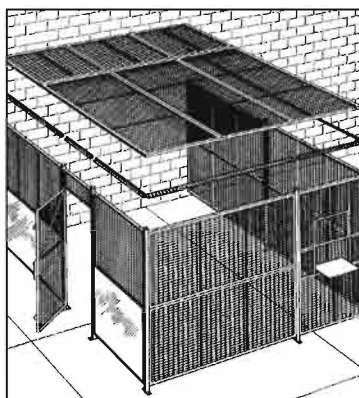

## Horizontal Carousels

## Flexible Work Stations

## Security Enclosures and Gates

## Multi Level and Modular Structures

- Utilize unused overhead space to double your floor space.
- Mezzanine modules can be free-standing or shelving supported.
- Modular In-Plant Offices and Security Fencing Maximize Expansion Flexibility

**Increase storage capacity up to 150%**

# Space-efficient Shelving and Drawer Storage Systems

- Drawers maximize density of small parts storage.
- Drawers installed in shelving between the knees and shoulders maximize ergonomics and efficiency when combining bulk and small parts.

- Flexible design solutions to store small parts in drawers and large parts on 8' spans
- Choose solid or wire shelves depending on application and code requirements

## The Value of Experience...

### Partial list of clients Southwest Solutions has served over the past 40 years:

Texas Instruments  
American Airlines  
Southwest Airlines  
Lennox International  
The Dallas Stars  
Alcoa Corporation  
DFW Airport  
Merit Energy  
Bell Helicopter

Nokia  
TXU  
Motorola  
Fort Hood  
Frito Lay  
Abbot Labs  
J.C. Penny  
Hatec  
Samsung

Lockheed Martin  
Nortel Networks  
Chevron Phillips  
Daimler Chrysler  
Sabre Holdings  
Dow Chemical  
Alcon Labs  
Frisco ISD  
Siemens

Michael Stores, Inc.  
Dyess Air Force Base  
Lackland Air Force Base  
University of Texas  
Southern Methodist University  
Texas Tech University  
Raytheon Corporation  
Houston Police Department  
Frank Mohn Houston Inc.

*More than 3,000 additional clients served.*

## The Value of Service....

Southwest Solutions Group employs more than 20 full-time factory trained and certified installation and service technicians to ensure on time delivery, proper installation, reliable preventative maintenance and warranty service.

SOUTHWEST**SOLUTIONS**GROUP

*business organization systems*

**Sales and Service throughout  
Texas, Oklahoma, Arkansas, Tennessee,  
Kansas & Mississippi**
