A healthy organization starts with a healthy environment. Properly planned and equipped, a facility's space can be effective, productive, and friendly. In short...healthy.

Working together with the Healthcare Community to Create Environments with a Steady, Healthy Beat.

The healthcare industry, like any other, must purchase furnishings when planning space for nurse stations, patient areas, and administration offices. These, and other areas, need casework, storage, and filing solutions to maximize space and efficiency.

There are elements that require specific attention such as sterile storage, stainless steel or solid surfaces, and flexible furniture for patient rooms. Southwest Solutions can help with the design of Pharmacy, Lab, Patient and all storage areas throughout the facility.

From modular casework to materials management, Southwest Solutions is prepared to help the healthcare community meet Green, LEED[®], performance, and operating standards.

Automated Storage & Sterile Supply

The complete healthcare facility includes automated storage and sterile storage solutions for each application, environment, and budget. Southwest Solution's quality solutions include:

Compact racking for materials management in a hospital or facility environment. From bulk storage to medications, storage must accommodate any shape or size.

 Sterile medical supply storage provides safe, easy and immediate access to any department's sterile supply need.

 Automated storage system for any department in your facility from pathology to pharmacy

 High density storage systems offer solutions for any department's storage needs. Sterile Supply Automated Storage Systems Pathology Storage Pharmaceutical Storage Materials Management Racks

Storage Solved

Labs, pharmacies, administrative offices, and sterile facilities all have specific storage and filing needs. We offer space-saving products to healthcare organizations that include high-density mobile systems, rotary storage, shelving, and lateral files that:

- increase productivity through organization and ease of retrieval—critical in emergency situations.
- increase storage in the same space by up to 50% while retaining flow and mobility.

- provide sterile storage solutions for the areas such as the operating room (OR) or cath lab.
- keep items safe and secure whether in a pharmacy, a patient's room, or in the OR.
- centralize documents and records while keeping protected health information safe and secure.
- store virtually any type of item in a mobile storage unit.

Records Management Solutions

Use Store Retrieve Destroy Recycle

Modern filing solutions consist of more than simply going to your local office supply store. Patient care requires detailed, safeguarded filing solutions that meet organizational and governmental standards. We can help your records management needs by:

- RFID tagging, indexing and tracking hard copy documents, imaged files, inactive documents.
- letting you design and print color-coded labels with bar codes, file names, dates, etc.
- integrating into office networks for seamless document management, bar coding, and imaging.
- creating and maintaining electronic images of paper documents for instant access.
- supplying everything you need including folders and storage solutions.
- offering archive storage and secure destruction/ recycling solutions.

Switch to EMR and Save money and space.

We can help you make the migration from paper-based to Electronic Medical Records. Retain inactive files onsite with space-saving storage methods while decreasing medical records storage costs.

Moveable Walls

Offices Conference Rooms Lobbies Patient Areas

Change is the only constant in your healthcare facility. Moveable walls make it easy to reconfigure or refurbish spaces and allow you to create elegant office fronts, divide open areas, or create new spaces when necessary. In addition, moveable walls:

are depreciated as furniture, not with the building; therefore easy to costjustify.

 are 95% reusable, contributing to buildings that are easy on the environment.

- e eliminate the need for fixed construction and drywall.
- allow finishes and designs not readily available with constructed walls.
- offer a variety of styles and materials, from wood to glass.

Facility signage is all about connecting. With your architecture. With those who use and visit your space. And with your brand. Signage should be in concert with all three. It as an opportunity, and indeed an obligation, to deliver to your project signage with these key dimensions of connectivity.

- Strategy and design
- Wayfinding & programming
- Documentation & management
- Installation & beyond
