

Intelligent package delivery.  
So clever it tracks you down.

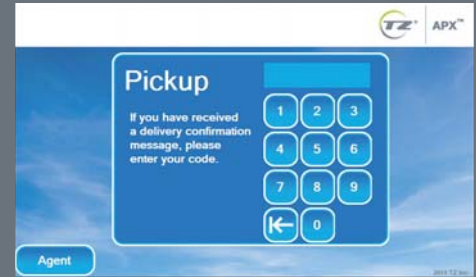

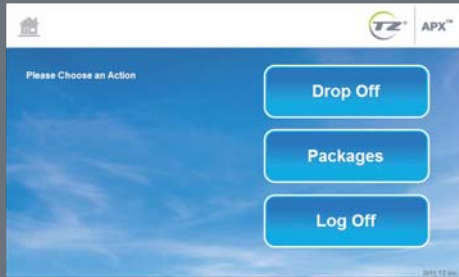

## The delivery no one can miss.

It begins with ‘Where’s that delivery...?’ and ends up costing time and money when that critical parcel goes missing and never makes it to the boss. As business grows, so does your parcel and document volume — and managing it becomes a major logistics challenge. With TZ APX™, it is one problem that neither you nor your boss will ever suffer again.

The **TZ Automated Parcel Exchange™** system — TZ APX™ — is designed to secure, streamline and track the parcel exchange process in busy work environments. The electronic, software-driven locker system automatically manages and monitors the exchange between the parcel’s entry point and its final recipient. Your team no longer needs to locate employees to deliver their

packages during facility hours. Parcels are deposited directly into TZ APX™ intelligent lockers and employees automatically receive an SMS text message with a secure and unique pick-up code that is used at their own convenience to open their locker. All along, the chain of custody and transaction process is monitored and tracked.

## Built for today's workplace.

### Convenient, 24/7 Access

- User-friendly, LCD touch screen graphical interface
- Notifies recipients via SMS messaging – e-mail notification optional
- Reminders can be set up to remind recipients of a parcel pick up
- Expiration dates can be established to identify packages not collected for removal from the locker and return to the sender

### Secure, Audited Chain Of Custody

- Uses authorized PIN access to enable secure parcel pick-up
- Tracks deliveries and customer pick-up activity
- System activity reports sent to Administrator via e-mail

### Time And Cost Efficient

- Significantly reduces labor cost for personal, desk delivery
- Eliminates missed deliveries and re-delivery attempts
- Optimizes user pick up efficiency and convenience

### Adaptable To Your Environment

- IOPC Modular Millwork® offers a wide range of configurations and designer finishes
- Custom finishes available to completely reflect the look and feel of your office environment

# specifications
