Welcome to the World of Phoenix Files and Safes

SOUTHWESTSOLUTIONSGROUP
business organization systems

Ask any Phoenix customer whose documents and data have withstood a fire and the water to put it out: Not all files and safes are created equal, and none rival the protection you'll get in products from Phoenix Safe International, LLC .

Phoenix distributes a full line of safes and files offering on-site records protection from fire, water and theft . Our products offer superior, independently tested protection to guard your valuables against the worst disasters . And with a variety of sizes, styles, finishes and colors, they cater to most designs and décors .

Phoenix has protected valuables since the 18th century . Originally known as Richmond Manufacturing, the company's origins were in maritime carpentry for merchant fleets sailing to America from Liverpool, England .

More than 200 years later, we launched Phoenix Safe International as the company's American arm . We personally present Phoenix to independent office product dealers nationwide, and our efficiency lets us give our customers legendary, one-on-one customer service when they need it .

In this catalog, you'll find a wide range of files and safes — supported by our inventory of nearly 2,000 quick-ship items, rigorously tested to meet the highest standards of protection and attractively designed to appeal to any customer .

As our newest line, World Class files offer our most popular combinations of features, sizes and colors without compromising style or toughness .

Thank you for considering Phoenix Safe International, where protecting your valuables is our burning passion.

Test Specifications

Fire Test Standards
Each Phoenix fire-resistant model is independently tested to European or American standards for fire protection and carries certification labels from the testing agency that identify the product's fire protection level .

Products for Storage of Paper Records: Products that provide fire protection for paper records are listed in this brochure with the designation of "Class 350 ." Tests for products designed to protect paper records range from 60 to 120 minutes in temperatures ranging from 1700°F to 1859°F . By comparison, a typical fire lasts 20 minutes and reaches 800 °F. During the fire test, the internal temperature of the product is monitored to ensure that it does not rise above a level that would endanger the paper documents stored within the product. The designation tag also indicates the length of the fire test as "1 HR, 1 ½ HR, or 2 HR" and is located next to each model number.

Products for Storage of All Computer Media: Products that provide fire protection for all types of computer media are listed in this brochure with the designation of "Class 125 ." Tests for products designed to protect computer media range from 60 to 120 minutes in furnace-burn time, at temperatures ranging from 1700°F to 1859°F . By comparison, a typical fire lasts 20 minutes and reaches 800 °F. During the fire test, the internal temperature of the product is monitored to ensure that it does not rise above a level that would endanger the computer media stored within the product . The designation tag also indicates the length of the fire test as "1 HR, 1 ½ HR, or 2 HR" and is located next to each model number.

MTC Grade B Rating
Certain types of computer media (CDs, DVDs, USBs and memory sticks) are less sensitive to heat and humidity than tapes, cartridges or hard drives . These less-sensitive items can be safely stored and protected inside some products designed to protect paper records . Products that carry the MTC Grade B rating have been tested and certified to provide adequate protection for these items . Products that are rated "Class 125" are designed to store and protect all types of computer media and should be used whenever the more sensitive items need protection .

Nothing destroys pasts and
threatens futures faster than fire.

Nothing protects them
better than Phoenix.

Fire is the most common disaster to befall businesses, forcing nearly half of those affected to close forever. Vital records and data also can burn up in minutes, irreplaceable through insurance.

Phoenix fire files save you from that stress — durably built to endure the harshest fires, attractively designed to fit many décors and readily available in the sizes you need.

All Phoenix fire files are tested at temperatures up to 1700°F and keep paper safe from the deadliest fires. Our proprietary insulation is independent to each drawer, protecting closed drawers even if one is left open. Inner steel jackets guard against theft via unlocked compartments and keep insulation out of documents, locking mechanisms and suspensions. And labyrinth sealing systems further defend documents from water used to extinguish fires.

Plus, Phoenix files protect digital media — with extra insulation and moisture barriers to guard memory sticks, hard drives, CDs, DVDs and USBs.

Phoenix files are as stylish on the outside as they are sturdy on the inside. Available in lateral or vertical sizes, their modern design assures a perfect fit for your home or office.

You can't predict fire, but you can plan for it. With Phoenix fire files, you're guaranteed to preserve your past and your future.

INTRODUCING WORLD CLASS PROTECTION

Meet the future of fire and water protection with World Class files from Phoenix.

True to its name, the World Class line blends the best of all Phoenix has to offer — rugged endurance to withstand the toughest disasters, eye-catching styles that fit in anywhere and the features you need to personalize your protection.

World Class files are built to the specifications you want, available in legal, letter and lateral size models.

And of course, World Class files stand up to the harshest fires and the water that puts them out. Each file is rated to protect your documents from intense fires, while a labyrinth sealing system and special gaskets prevent water damage from sprinklers and fire hoses.

The features you want.
The style you prefer.
The toughness you expect.

Welcome to World Class fire protection from Phoenix.

Combining powerful protection and aesthetic polish, World Class lateral files cater to heavy-duty storage needs. Each drawer is equipped to handle legal- or letter-sized folders from front to back or side to side. Drawers also use a three-way suspension for stability and feature an anti-tip safety mechanism that prevents more than one drawer to open at a time.

FIRE FILES
FEATURES

Phoenix World Class and Business Class fire files work from the inside out to safeguard your records. Here are some of the individual parts that add up to unparalleled protection for your paper documents and digital media (CDs, DVDs, USBs and memory sticks) from fire, water and theft:

- 1 Solid, one-piece steel construction of the outer body provides superb durability
- 2 High-sided drawers and adjustable rails allow hanging-folder filing
- 3 Movable dividers accommodate standard folder filing in vertical files
- 4 Key-operated plunger lock ensures privacy
- 5 Proprietary Styronite insulation ensures a world-recognized certification of Class 350 – 1-hour fire protection from Europe’s prestigious SP Institute; files are also explosion- and impact-resistant
- 6 Independently insulated drawers protect closed compartments if one is left open
- 7 Inner steel jackets prevent access from unlocked compartments and insulation from touching your documents
- 8 Labyrinth sealing system and special gaskets prevent water damage from fire-hose spray or sprinklers
- 9 Lock-bypass mechanism allows selected drawers to remain unlocked, even when the file is locked

BUSINESS CLASS FILES

Business Class fire files protect your valuable documents and personal belongings from devastating, destructive fires and the water used to extinguish them.

CUSTOM CLASS FILES

Available as verticals or laterals, Custom Class fire files complement superior protection with customizable options, including colors and locks.

FIRE
PROTECTION

STANDARD FEATURES

If you're looking for all the right features and room to customize, Custom Class files are a perfect choice.

Vertical Features:

- ▶ Two, three and four drawers available in legal- and letter-sized widths in 31"D models . Two and four drawers available in 25"D models .
- ▶ Perfect protection for paper, with the UL Class 350 — 1-hour fire-resistant rating
- ▶ Rated to resist explosions of up to 2000 °F
- ▶ Design guards against water damage from fire hoses and sprinklers
- ▶ Gang lock, selective locking system, key lock for privacy, and follower blocks
- ▶ Steel-lined drawers keep insulation out of sight

Lateral Features:

- ▶ Available in two-, three- and four-drawer 38"W and 44"W models that accommodate legal- and letter-size files
- ▶ INTERLOCK system allows only one open drawer at a time to prevent tipping
- ▶ Three-arm SwayGard suspension system minimizes torque
- ▶ One-hour fire-resistant rating and protection against explosions up to 2000 °F
- ▶ Design guards against water damage from fire hoses and sprinklers
- ▶ Gang lock, selective locking system and key lock for privacy
- ▶ Steel-lined drawers keep insulation out of sight
- ▶ Integral rails for left-to-right filing of hanging legal documents; optional rail for hanging letter documents also available as an accessory
- ▶ Cross rails for front-to-back filing of legal- or letter-size documents included

OPTIONAL ACCESSORIES

Custom Class vertical and lateral fire files are available with a full range of optional accessories for increased efficiency, including:

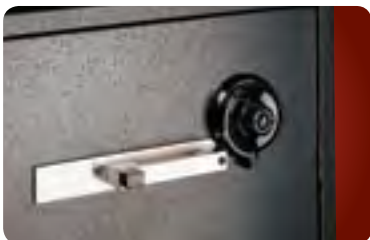

Interior cross trays

Permits the filing of checks and cards of various dimensions . Trays can easily be removed and carried to your work area and replaced in file drawer later.

Drawer-in-a-drawer

Factory-installed; doubles drawer capacity when filing card files or checks . Each drawer section opens independently for easy access .

Special lock options

Includes dial combination locks, electronic combination locks and additional key locks . Call to learn more about our locking options .

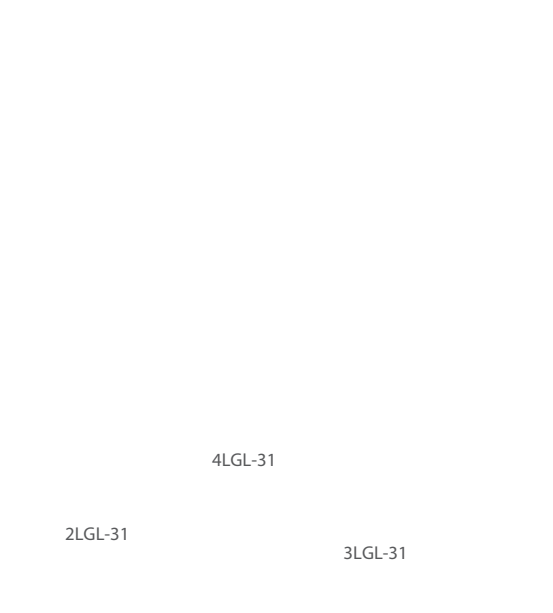

Row inserts

Installed in drawers to keep checks or card files neatly organized and easy to access .

*Caster base (Not Pictured)

Provides a sturdy, mobile foundation .

Vertical Files

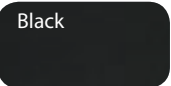

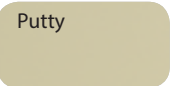

Space-saving vertical files elegantly blend into any environment while protecting your vital records, with fire protection perfect for your important paper records.

Phoenix safes protect your documents and peace of mind.

Talk about a perfect combination.

Phoenix safes let you enjoy unrivaled safety and security in any location. Lock a laptop in a dorm. Protect personal documents in a den. Take precautions for cash at a business. Whether you're guarding money, records, electronics or data, we've got the safe for you.

Our Fire Safes shield belongings from the hottest fires for up to two hours. In our Cashier Deposit Safes, solid steel provides immediate security to safeguard goods and money.

Double-door construction and water-resistant seals on our DataCare Safes are specially built to protect media and data. And our FSB (fire and security protection) Safes come standard with eight reinforced bolts and heavy-duty doors to resist external attacks.

Many of our models feature easily programmable, user-friendly digital electronic locks. And biometric fingerprint locks are available for our FSB line, offering the ultimate in state-of-the-art safekeeping.

No matter what type of thief is trying to do its worst, a Phoenix safe is always at its best.

MEDIA SAFES

Phoenix DataCare Safes are specifically designed for unrivaled data defense with first-class protection against fire and water damage, as well as superb security and privacy options.

DATA
PROTECTION

2002

				lower	12	19¾	17				2.33 cu. ft.		

*Height, weight and depth measured in inches.

990 Series Features:

Churches, concession stands, ticket offices and fundraiser collection sites have all relied on Phoenix depository safes to protect collected cash until deposited at the bank

The 990 Series bodies are constructed with a ¼” steel plate, with a ½” door of solid steel that is further reinforced with hardened anti-drill plates over the locking area

Large-capacity drop area can accommodate money bags, envelopes, packages and deposit capsules

- ▶ Front-loading models 991, 991E, 991T, 991TE, 992 and 992E are fitted with a special Phoenix tilting baffle plate to ensure that the contents cannot be “fished out”
- ▶ Models 992 and 992E have separate lockable deposit chamber inside
- ▶ Models 991, 991T, 992, 994 and 994T are available with a dial combination lock

995

994TE

994

Top-Loading 990 Series Models

Top-loading models use a rotating drum to seal the safe completely after deposits.

995/995E	35	16¾	20	upper lower	14 13½	16½ 16½	17½ 17½	3⅛ 10⅝	298 lbs. 2.33 cu. ft. 2.26 cu. ft.	upper lower	N/A

*Height, weight and depth measured in inches.

- ▶ All deposit safes are predrilled for bolting to the floor
- ▶ Model 995 is available with a dial combination lock on the top compartment and a high-security key lock on the bottom compartment
- ▶ The top loading rotary models 994, 994E, 994T, 994TE, 995 and 995E have a rotating drum that completely seals the safe after the goods or cash have been deposited

- ▶ Models 991E, 991TE, 992E, 994E, 994TE and 995E feature electronic combination locks (pictured below)

Optional Electronic Lock

FSB SAFES

Thieves and fire meet their match with the FSB Series, combining impenetrable construction, theft-repellant reinforcements, fire-resistant protection and user-friendly biometric fingerprint locks.

FIRE + THEFT PROTECTION

THEFT PROTECTION

5601

5603

5604

FSB 5600 Series

All Phoenix FSB safes boast two vertical and three horizontal solid-steel, chrome-plated active bolts, three dead bolts, and reinforcements on those bolt cups to resist tool attacks. Lock areas include reinforcement to resist drilling and a relocking device for added protection, while heavy-duty door hinges resist external attacks.

Burglars won't get in, and neither will fire or water — with protection for one hour at temperatures up to 1700°F, seals to prevent damage from fire hoses or sprinklers and certification of RSC security specifications.

Model	External			Internal			Weight	Cubic Capacity	Accessories
	H	W	D	H	W	D			
5601	20½	20½	22	15¾	15¾	14¾	210 lbs.	2.06 cu. ft.	1 shelf

5603	33⅞	24⅞	22	29⅞	20	14¾	375 lbs.	4.85 cu. ft.	2 shelves
5604	41⅞	24⅞	22	36⅞	20	14¾	430 lbs.	6.10 cu. ft.	2 shelves

-Height, width and depth measured in inches.

FSB after tool attack

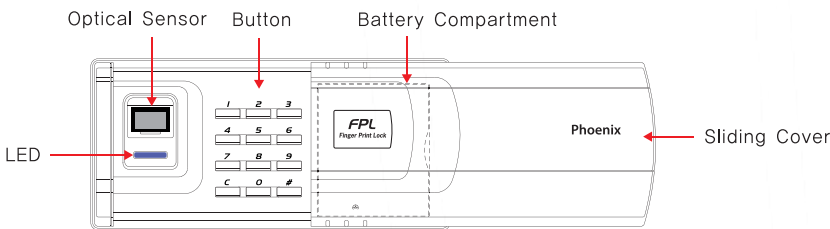

Convenience. Security. Innovation. The Phoenix Biometric Fingerprint Lock

The Phoenix biometric lock is personalized to the user's fingerprint and doesn't require metal keys or combinations to open. This makes it one of the most convenient, reliable and personal locks available.

Lock Features

- ▶ Accepts up to 100 different fingerprints
- ▶ Simple optical sensor system used to register user fingerprint(s)
- ▶ Dust cover protects lock while not in use
- ▶ Digital combination included in lock, which can be used in place of fingerprint system if desired
- ▶ Worldwide quality classifications

MULTI-USER SAFES

These convenient, rugged safes are designed for dorm rooms, assisted-living apartments and other commercial or domestic uses.

980N

986D

Imperial 980 Series

Large enough to store laptop computers, these combination-lock safes are perfect for multiple users. With an easy-to-change combination, the Imperial Series is perfect for locations such as dormitories, hospitals, assisted-living homes and other facilities where occupants change often.

Model	External			Internal			Weight	Cubic Capacity	Accessories
	H	W	D	H	W	D			
980N	7⅞	17⅞	14¾	7½	16¾	11	30 lbs.	.80 cu. ft.	N/A
986D	9⅞	17⅞	15	9½	16¾	11	30 lbs.	1.01 cu. ft.	N/A

-Lockable drawers reduce usable internal height by 4 ½".
-Height, width and depth measured in inches.
-Other accessories are available.

Model 986D is programmable to read credit cards or other magnetic-strip cards for combinations. The touchpad can also be used alone or in conjunction with the strip-card lock. An override key also is included.

DATA CARE MEDIA INSERTS

Vulnerable to excess heat and moisture, your computer media needs additional protection even when stored in an insulated file or safe, where the internal temperature can reach as high as 350°F and humidity levels can reach 100%.

- ▶ Certified protection for all media types, including removable hard drives
- ▶ DataCar e Media Inserts are designed to work with any Class 350-rated insulated file or safe to provide an environment that will keep your data protected
- ▶ Extra insulation and special moisture barriers keep the insert's internal temperature below 125°F and the humidity level below 80% during the 1700 °F — 1-hour fire test

Media Insert for safes 507, 509, 1902, 1903
