Easy to use wall mounted Rollaway Cart

Shown above is the TiltNStore® Wall Mount Rollaway Cart, model TC-1000.

Why does overhead storage make sense?

- 1. Keeping small inventory items together and stored safely on regular shelving is not always the best idea. Things can get moved, dropped or even walk away.
- 2. When inventory is kept on the Rollaway Cart you know where it is and it's easy to load and unload.
- 3. When the Cart is overhead nothing gets fiddled with.
- Every month you are paying for open wall space that could be used for optimal storage. Your empty walls suddenly become very valuable.

How does it work?

- 1. The TiltNStore® mounts onto your wall so there is no need for a remodel. You don't even have to move your existing shelving.
- 2. Push the keyed button and the Rollaway Cart comes right down to you.
- 3. Unlatch the cart and roll it onto the sales floor. You can also roll the cart to the delivery trucks for direct loading.
- 4. Roll back to the lift and reattach it to the lift.
- 5. Push the keyed button and up it goes.
- 6. When the lift is up you can relax knowing your inventory is safe and secure because no one can tamper with it. Your aisles stay open and clear.

- The Rollaway Cart is made of steel, ships flat and features smooth rolling wheels.
- All TiltNStore® Wall Mount Lifts do the same thing, they go up and down. They are simple, reliable and strong.
- Because the TiltNStore® Wall Mount Lift is an 'electric appliance' not a 'building improvement', you will enjoy a nice tax break
- Every LiftNStore® Lift is made with pride in the United States of America.
- Your satisfaction is guaranteed.
