*Touch*TM

CONTAMINATION AND TEARS ARE A THING OF THE PAST WITH NO-TOUCHTM... FROM THE SPD TO THE OR, WITH VIRTUALLY NO HUMAN INTERACTION

The No Touch system eliminates human interaction during instrument transport thanks to our dedicated ISO Standard Stainless Steel shelves and baskets and our functional lines of open and closed transportations carts.

STEP 1

Clean Instrument Wrapping

STEP 2

Wrapped Instruments are placed on No Touch Shelf and into Sterilizer (shelf is handled, pack is not touched)

STEP 3

No Touch Shelf (w/sterile pack) is transported to Sterile Storage (shelf is handled, pack is not touched)

STEP 4

No Touch Shelf (w/sterile pack) is transported to OR to be Opened by Nurse

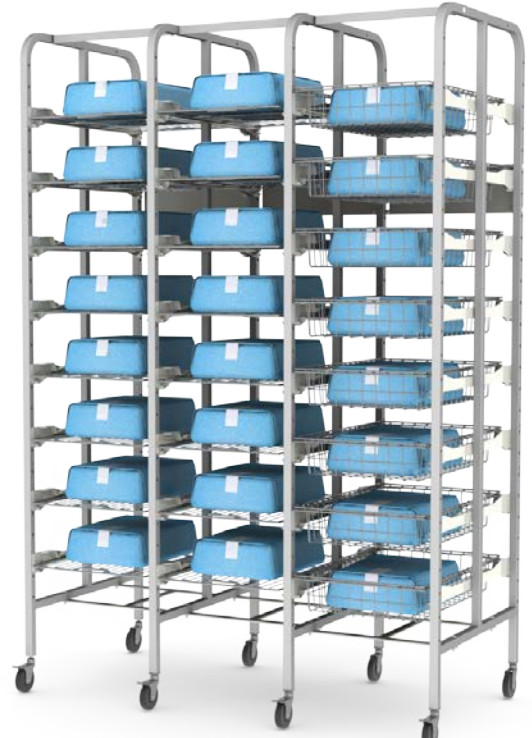

Mobile & Stationary Storage Systems

Aluminum Transport Cart

Open Transportation Trolley

Sterile Instrument Pack Storage

Eliminate contamination and tears during transportation by touching only the carrier shelf, and not the sterile pack

- ✓ Maximum sterility during transportation
- ✓ Safeguards patients from infection
