

# Plexiglass Shelf Lip

The plexiglass shelf lip for four-post is designed to fit into the front and/or back uprights of a shelving unit to keep objects safely in their place. Originally designed for the pharmaceutical and medical industries, the clear, acrylic bin front allows shelf contents to be easily viewed, organized and accessed.

- Available in all standard shelving widths: 24", 30", 36", 42", and 48"
- Heights of 2", 4", and 6" available to accommodate any size bottles and other stored items
- Can be positioned in any open location on the uprights for even more customization
- Designed to be compatible with the standard dividers for four-post shelving, so that additional organization can be utilized on the shelves
